Hi, a very GOOD-DAY to you from CAREERKHOJJ team!

It is a matter of self-appreciation for you that you have taken the most important decision of your life to go on a guided tour of career planning program with us. Have a cold coffee and relax! You are about to know some amazing facts about yourself and in the due course, about us too.

CAREERKHOJJ means "A platform that will help you find (Khojj) a perfect career according your inner talent." – We at CAREERKHOJJ®, have a team of experts who will help you discover your career path, and hence we proves to be a Complete path Finder! To build a rewarding career one need to have a right choice of platform along with talent. Our vision is to provide a pathway to an individual by that he can convert his ambition & interest into a successful career, by a means of precise mentoring & guidance. The world after school is full of career choices. Compared to just about a decade ago, today the career options for a student passing out of school, have multiplied exponentially.

In such a scenario, out of all the fields you are good at, you need to figure out what suits you the most, when it comes to building a career. In other words, discover the most suitable career option for you. Every individual has some unique talent, but most students could not find a career according to his talent & interest or could not find a way to achieve it due to lack of knowledge, misconception or guardians pressure. So we act as a mirror to make a student realize that unique ability prevailing in him/her & guide them by providing all the available options in terms of selection of branches, institutes, colleges with reviews of experts, students & professionals. We are sure that one of these questions or most of them would have touched you at one or other point in your life. Lets go ahead and see how "Career Choice" is done today.

We are sure that one of these questions or most of them would have touched you at one point of time or the other. Lets go ahead and see how is "Career Choice" done today.

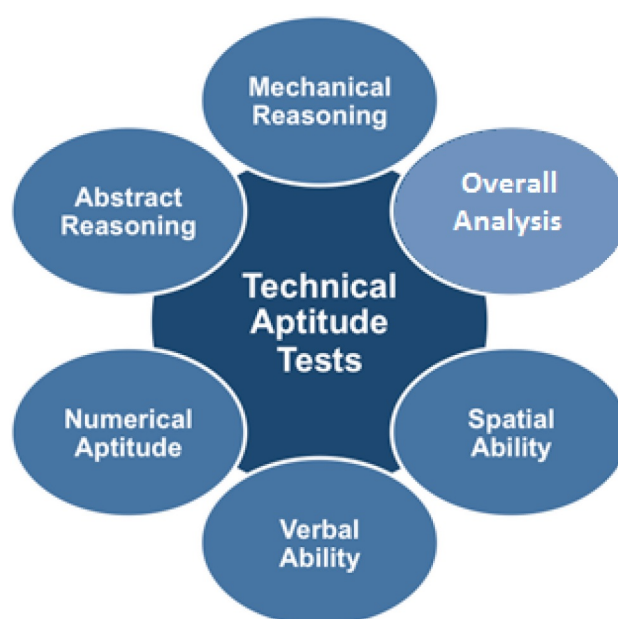

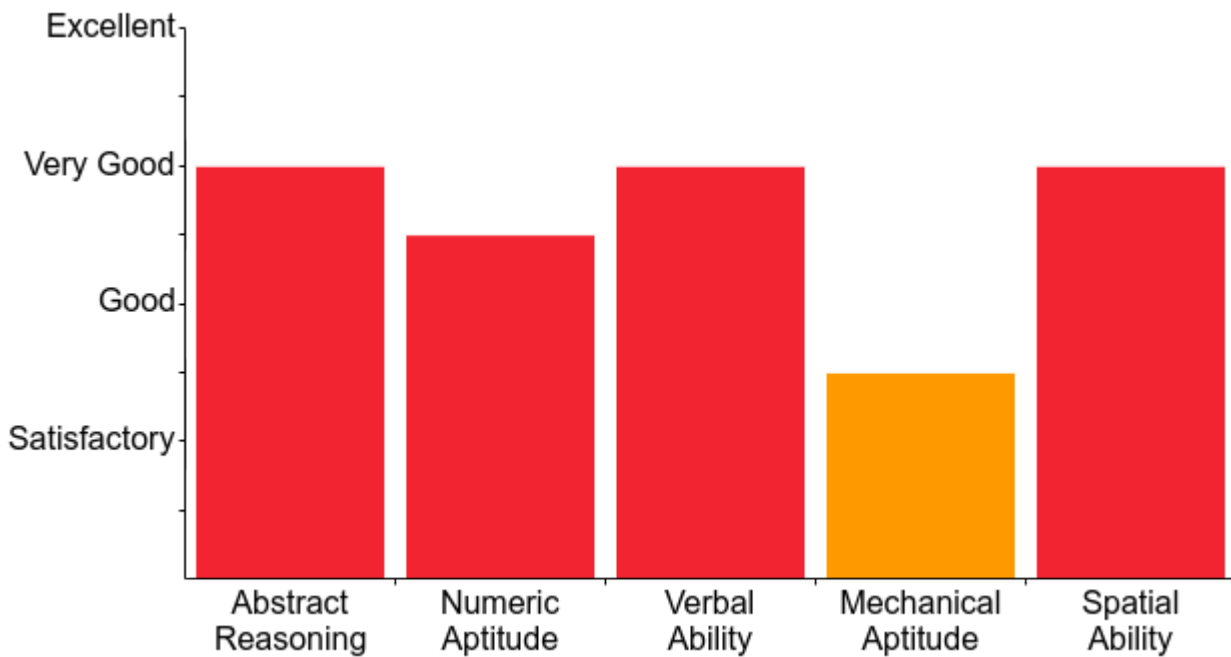

## What is an Aptitude?

An Aptitude is a component of a competency to do a certain kind of work at a certain level, which can also be considered "Talent". Every individual is unique and is born with certain inherent potential or talent. This talent helps them learn things easily and quickly. Psychologists call this potential as Aptitude.

Aptitude gets reflected in an individual, essentially as a result of early exposure during childhood and growing up years. Each one of us does several tasks or study different subjects or interacts with different people or works in different environment. While doing so we utilize our aptitude to perform or understand these. Aptitude plays a vital role in success.

The aptitude assessment test measures six different aptitude based abilities of a user. In the assessment report you will find your aptitude scores, which are not absolute, but are relative scores. This means that your scores have been statistically compared with the People of your age group and then used for further analysis. Aptitude tests may also look for the presence of abilities that are specific to a particular occupation or area of study. You will find them depicted as Excellent, High, Above Average, Average or Below Average. It is not important to have a High score in all the Aptitude based abilities but important to have the right combination of abilities, which would fit with career.

### Your Aptitude Test Result

Your performance is **Very Good** in Abstract Reasoning.

Your performance is **Very Good** in Numeric Aptitude.

Your performance is **Very Good** in Verbal Ability.

Your performance is **Good** in Mechanical Aptitude.

Your performance is **Very Good** in Spatial Ability.

## Abstract Reasoning

### Meaning

It measures your ability to identify the underlying logic of a pattern and then determine the solution. Abstract reasoning ability is believed to be the best indicator of fluid intelligence and your ability to learn new things quickly. Questions related to abstract reasoning appear in most technical aptitude tests.

### Application

Every subject requires you to co-relate and interpret theories and other concepts. After reading any information, you start analyzing and co-relating the data. Example: Reading and gravitational pull and reasoning why people fall only towards earth!

### Improvement

You can enhance this ability by reading small passages and concluding the information gathered. Start enjoying questions like when, why, who, what, how etc.

## Numeric Ability

### Meaning

It includes basic arithmetic, number sequence and simple mathematics. These questions appear in most technical aptitude tests because employers usually want some indication of your ability to use numbers even if this is not a major part of the job.

### Application

Numerical ability is essential to organize numerical data for simple calculations. In academics, problems solving and precise measurements are required. Example: Finding out the area of a circle, solving SUDOKU etc. reflects numerical ability.

### Improvement

It can be improved by understanding concepts in mathematics. You may refer scholarship Mathematics to sharpen the concepts. You can go through the concepts of primary standards and try to solve them across the chapters.

## Verbal Ability

### Meaning

Verbal ability measures your degree of comfort with English Language. It includes spelling, grammar, and ability to understand analogies and follow detailed written instructions.

### Application

When we want to express precisely on any topic, this ability is very useful. Example: Participating in an essay writing competition, a leading journalist conducting a debate on national television.

### Improvement

By increasing words and vocabulary on day to day basis, you can improve it. You may read each sign boards, advertisement on the outside to enhance it. Other way is by keeping in touch with dictionary and thesaurus daily.

## Mechanical Ability

### Meaning

It is designed to assess your knowledge of physical and mechanical principle. For example, pulleys, levers, simple electrical circuits etc. Mechanical reasoning tests are used to select for wide range of technical occupations.

### Application

In our daily life to deal with technical application of various appliance and machines, auto parts or technologies.

### Improvement

By asking HOW questions to each part, connections or machines that we are using in our daily life. Example: You can search basics while dealing with automobiles, gears, circuits etc.

## Spatial Ability

### Meaning

The ability to interpret and make drawings, form mental images, visualize movements or change in those images. Spatial ability tests measure your ability to manipulate shapes in 2D or to visualize 3 D objects presented as two dimensional pictures. Spatial ability tests often involve the visual assembly and the dis-assembly of objects that have been rotated or which are viewed from different angles or objects that have different markings on their surfaces.

### Application

It is necessary in day - to - day life to make a judgment about space with respect to length, width, depth, distance, speed etc. This ability is necessary for all sorts of academics in which understanding and use of 2-D and 3-D is required. Example: If you are standing in front of a big mall, what can be probable height, width and depth in feet?

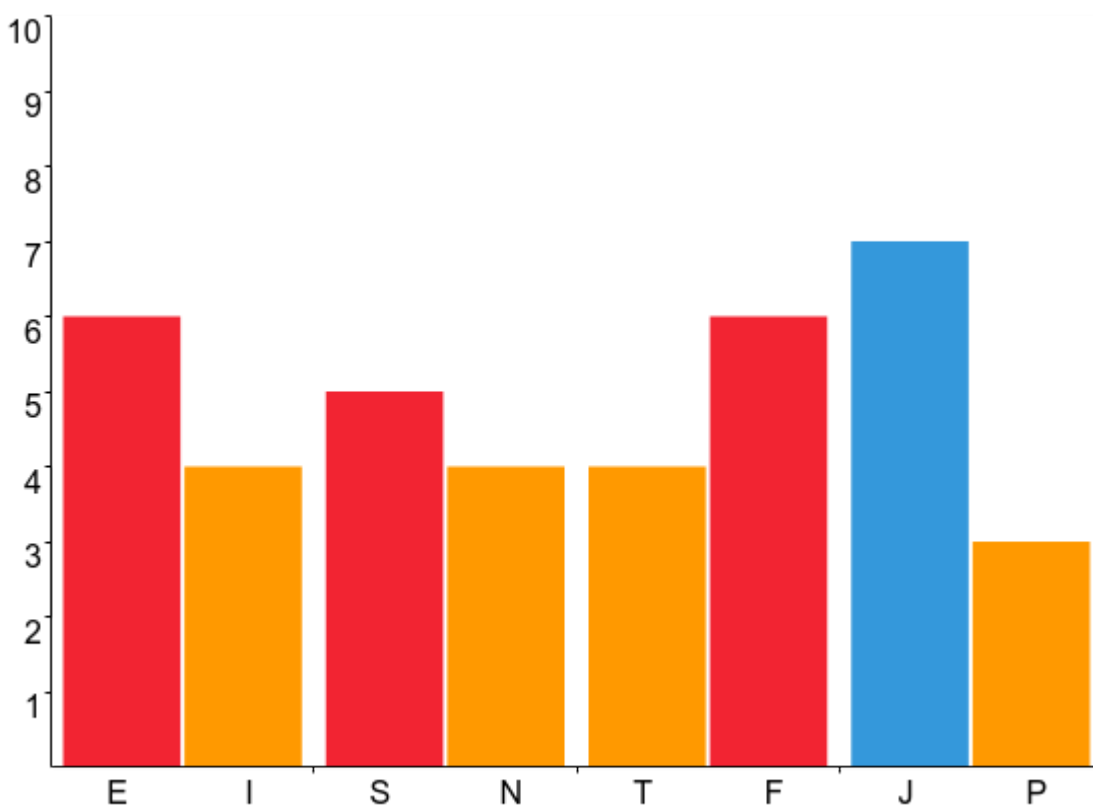

### Improvement

By improving imagination in each thing and try to visualize objects in 3-D Dimension, one can improve spatial ability.

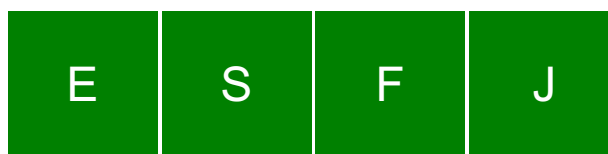

## What is Personality?

Personality is the sum total of all the different ways in which a person reacts and interacts with others. Personality is the product of combined effects of heredity and environment. Personality test helps in understanding your personality type which will enable you to choose a suitable course and career path. It also helps in understanding your inner self, why you behave or make decisions in a certain way.

Here, E = Extraversion, I = Introversion, S = Sensing, N = Intuition, T = Thinking, F = Feeling, J = Judging, P = Perceiving.

## Your Personality Type

## Which is your most natural energy orientation? (E-I)

Every person has two faces. One is directed towards the OUTER world of activities, excitements, people, and things. The other is directed inward to the INNER world of thoughts, interests, ideas, and imagination.

While these are two different but complementary sides of our nature, most people have an innate preference towards energy from either the OUTER or the INNER world. Thus one of their faces, either the Extroverted (E) or Introverted (I), takes the lead in their personality development and plays a more dominant role in their behavior.

## Which way of perceiving or understanding is most "automatic" or natural? (S-N)

The Sensing (S) side of our brain notices the sights, sounds, smells and all the sensory details of the PRESENT. It categorizes, organizes, records and stores specifics from here and now. It is REALITY based, dealing with "what is." It also provides the specific details of memory & recollections from PAST events.

The Intuitive (N) side of our brain seeks to understand, interpret and form OVERALL patterns of all the information that is collected and records these patterns and relationships. It speculates on POSSIBILITIES, including looking into and forecasting the FUTURE. It is imaginative and conceptual.

## Which way of forming Judgments and making choices is most natural? (T-F)

The Thinking (T) side of our brain analyses information in a DETACHED, objective fashion. It operates from factual principles, deduces and forms conclusions systematically. It is our logical nature.

The Feeling (F) side of our brain forms conclusions in an ATTACHED and somewhat global manner, based on likes/dislikes, impact on others, and human and aesthetic values. It is our subjective nature.

While everyone uses both means of forming conclusions, each person has a natural bias towards one over the other so that when they give us conflicting directions - one side is the natural trump card or tiebreaker.

## What is your "action orientation" towards the outside world? (J-P)

A Judging (J) style approaches the outside world WITH A PLAN and is oriented towards organizing ones surroundings, being prepared, making decisions and reaching closure and completion.

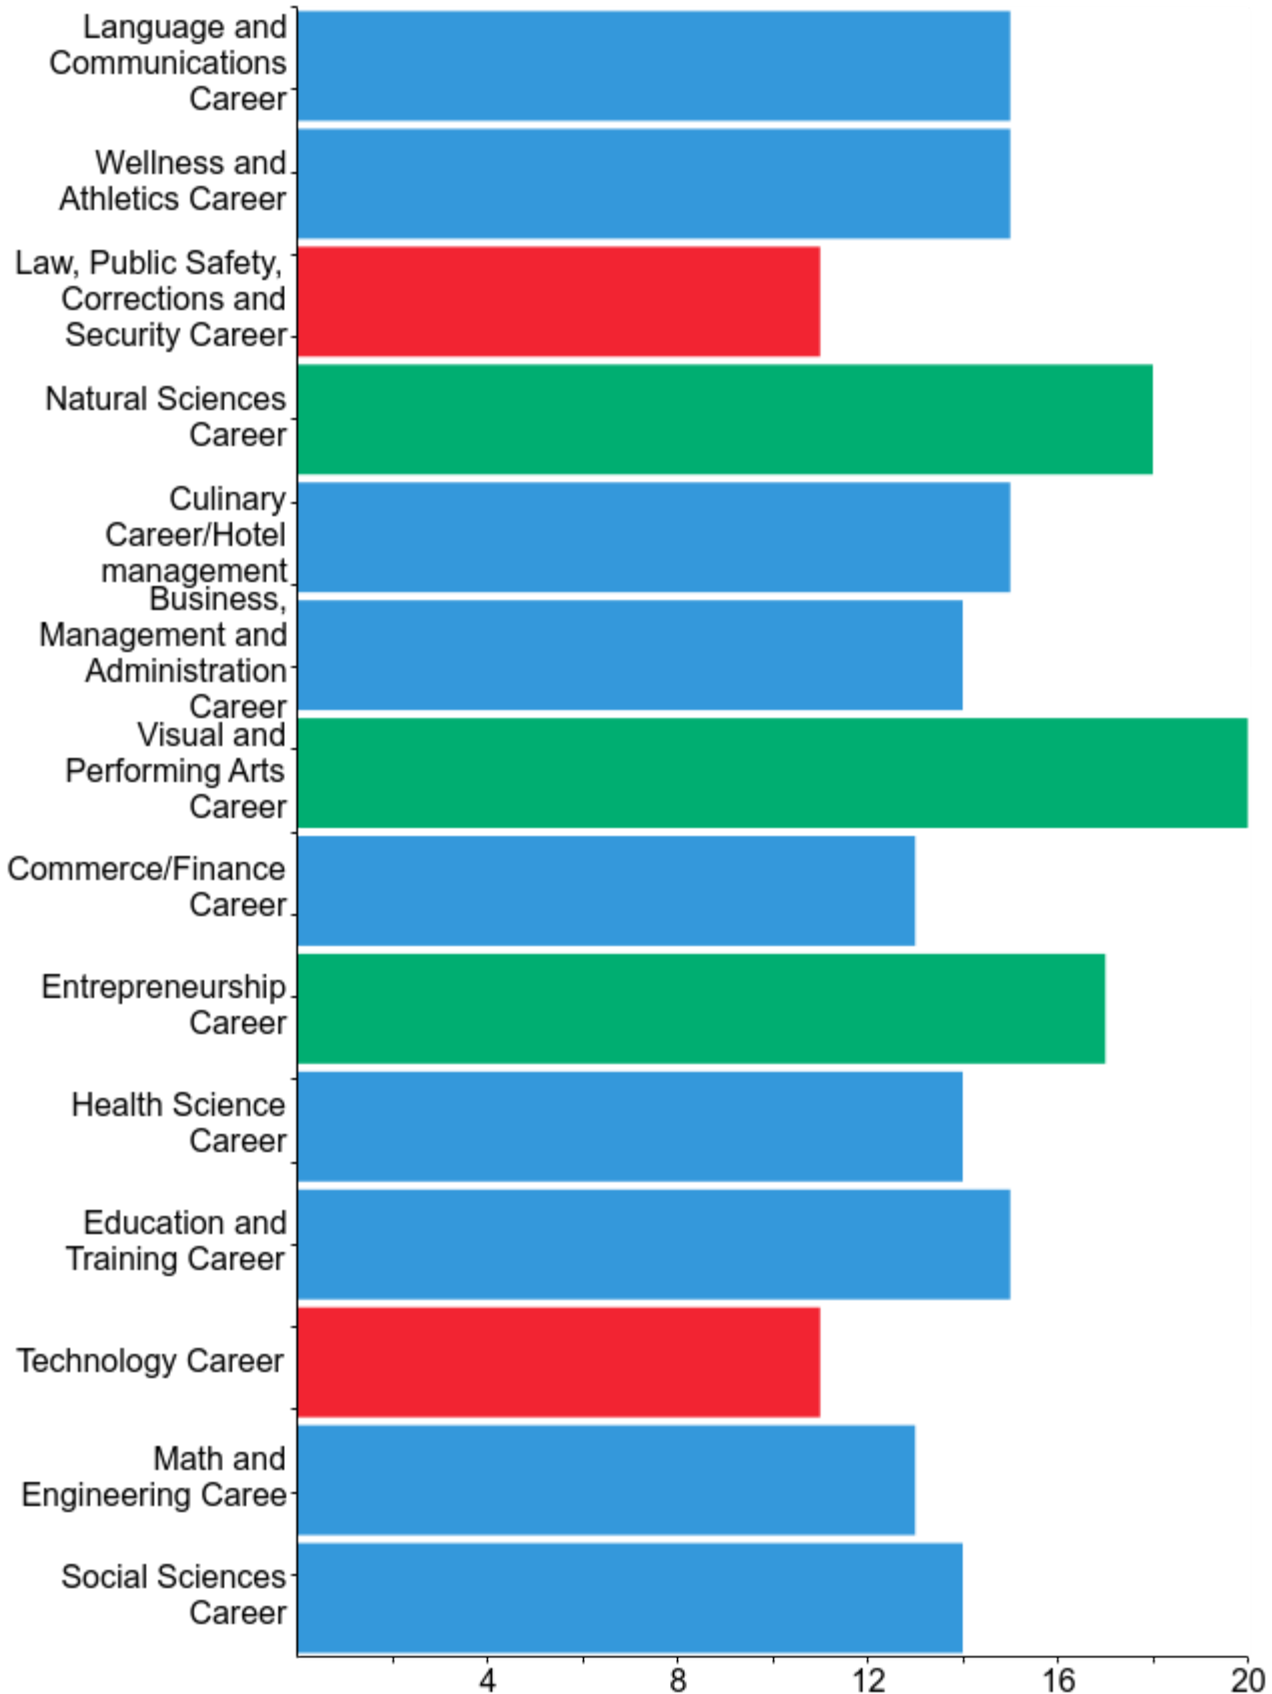

A Perceiving (P) style takes the outside world AS IT COMES and is adopting and adapting, flexible, open-ended and receptive to new opportunities and changing game plans.

### Conclusion: [ESFJ]

Warmhearted, conscientious, and cooperative. Want harmony in their environment, work with determination to establish it. Like to work with others to complete tasks accurately and on time. Loyal, follow through even in small matters. Notice what others need in their day-by-day lives and try to provide it. Want to be appreciated for who they are and for what they contribute.

What is your interest?

**Score you have obtained in each INTEREST type with Recommended Career fields:**

## **Social Sciences Career (So.) : 14**

Psychology, sociology, and human relations are beneficial courses to take for a career in the social sciences. There are courses like MSW, Human Resource Management, Anthropology, archaeology etc available for you.

## **Math and Engineering Career (Math) : 13**

Any degree or diploma engineering courses or B.Sc. with mathematics, physics, chemistry are suitable for you. Can do engineering in domains like agriculture, dairy technology, machines, structures, chemical, civil, architecture, electrical & circuits, flying & automobiles etc.

## **Technology Career (Tech.) : 11**

Take as much math as possible and any computer programming or computer science courses are available. Careers like computer or IT engineering, B.SC IT, BCA/MCA and also hardware & networking courses related with computer & Technology are preferred.

## **Education and Training Career (Edu.) : 15**

Take courses in the particular subject you would like to teach. Public speaking and writing courses will be useful. Also, emerging technology is valued in education, so you can take careers in emerging technology field as a trainer or teacher.

**Visual and Performing Arts Career (Arts) : 20**

Writing, public speaking, and art courses are important. Start creating a portfolio of your performances and work, Art Therapist, Art Director, Art, Drama, or Music Teacher, Fine Artists (various), Digital Artist (various), Museum Technician and Conservationist, Commercial and Industrial Designer, Model/Actor, Makeup Artist or Cosmetologist (hair stylist), Stage Design and Manager, Broadcast/Audio Engineer, Fashion Designer, Interior Designer, Musician/Music Producer, Video Game Designer.

**Business, Management and Administration Career (Busi.) : 14**

Communication courses that develop your writing and public speaking skills are beneficial. Bachelor courses with management or business like BBA, BAM, BBM or Master courses like MBA, PGDM, MAM or applied management courses are preferred. Courses where administration skills or people management skills used are most valued.

**Culinary/Restaurant management Career (Culinary) : 15**

You want to be proficient in math and have a basic understanding of business, Restaurant Owner / Manager, Caterer, Pastry Chef (Baker), Sommelier (Wine Expert), Personal or Restaurant Chef, Nutritionist, Restaurant Supervisors / Managers (various). Go for Diploma/Degree/B.SC of Hotel management or else hospitality management.

**Natural Sciences Career (Natural) : 18**

Here, Courses to be adopted which are related with earth substances & nature. Rigorous science courses are the most valued, Zoologist, Biologist (various), Environmental Scientist, Anthropologist, Conservationist (various), Anthropologist, Archaeologist, Chemist, Agriculturalist, Science Teacher (various), Research Scientist, Astronomer, Geologist, and Horticulturalist.

## **Law, Public Safety, Corrections and Security Career (Law & Secu.) : 11**

Knowing a commonly used second language, public speaking, and writing skills are useful, Forensics (Crime Scene Investigation), Law Enforcement (Police, Detectives), Paralegal (Legal Secretary), Correctional Officers, Fire fighters, Lawyer / Judge, Security Guard, Wildlife Officer.

## **Wellness and Athletics Career (Wellness) : 15**

Courses related to nutrition, health education, physical education, human biology, and psychology are helpful, Coach and Talent Scout, Athletic Trainer, Athlete, Fitness and Wellness Trainer, Umpire, Referee, and Other Sports Official, Recreation and Fitness Teacher, Sports Medicine Physician, Nutritionist or Dietician, Physical Therapist, Massage Therapist, Recreational Worker.

## **Language and Communications Career (Lang.) : 15**

Writing, public speaking, computer classes, and courses in the humanities are valued. Psychology and sociology will be beneficial. Foreign languages and trainer as a career would be beneficial.

## **Health Science Career (Health) : 14**

Human anatomy, biology, chemistry, and physics courses are highly beneficial. Medical, paramedical, B.SC with biology or chemistry as major subjects, certificate health science courses or medical technician courses are valued.
